## HOW IT WORKS

If you have the required skills, implementing any QuickBooks solution could be **SIMPLE**, **EASY** and **FAST**. In the absence of necessary skills and expert help however, this could be a frustrating exercise resulting into either a complete mess or less than satisfying results.

Combining years of experience & intimate QuickBooks knowledge with enterprise level skills for business processes optimization, we can deliver a simple QuickBooks implementation initiative in as short time as one day. Larger and more complex environments would need larger scopes and longer implementation time.

Whether large or small, whether complex or simple, our implementation methodology remains constant. We begin with a complete scan of your business value chain and map your relevant business processes. This is followed by development of information requirements and control needs blueprint. The software is then configured and is implemented followed by data import/creation.

No matter how crude, no matter how complex, from beginning to the end, we can transform your accounting and reporting function within **ONE to TEN Days**.
