

CFO ADVISORY & TRANSFORMATION

Strengthening Finance Leadership,
Enhancing Capability, Enabling Better
Decisions

Supporting CFOs, CEOs, boards, and investors
across the GCC, United Kingdom, and
international markets

Finance leadership shapes
how organizations plan,
perform, and grow

ACS SYNERGY works alongside CFOs and leadership teams to strengthen finance capability, enhance decision-making, and support transformation initiatives through a combination of advisory insight and execution support

WORKING ALONGSIDE FINANCE LEADERSHIP

ACS SYNERGY provides targeted support to CFOs and leadership teams across planning, performance visibility, strategic initiatives, and finance transformation.

Our involvement is focused and aligned, strengthening specific areas of the finance function while working within existing structures, priorities, and leadership frameworks.

SUPPORT WHERE IT MATTERS MOST

ACS SYNERGY focuses on areas where additional capacity and specialist expertise can deliver immediate and meaningful impact.

This includes strengthening planning and analysis, improving performance visibility, supporting strategic initiatives, and enhancing the overall structure and scalability of the finance function.

The emphasis is always practical, focused on outcomes, clarity, and sustainable improvement.

AN INTEGRATED APPROACH

Advisory and execution are delivered together.

This allows us to contribute at both levels, supporting leadership on strategic priorities while also working with teams to implement improvements across processes, systems, and reporting.

The result is progress that is both structured and sustainable.

A COMPLEMENTARY ROLE

Our role is to complement and reinforce finance leadership.

We work alongside existing teams, providing additional perspective, capability, and support, without disruption to established structures.

Engagements are shaped around specific needs, ensuring that support is relevant, targeted, and aligned with business priorities.

THE OUTCOME

A finance function that is better supported, more structured, and more capable, with leadership fully in control.

BUILDING HIGH-PERFORMANCE FINANCE FUNCTIONS

ACS SYNERGY contributes across the core areas that define the effectiveness of a finance function, combining advisory input with hands-on execution where required.

STRATEGIC FINANCE & DECISION SUPPORT

Strengthening planning, forecasting, and performance visibility to enable clearer, more structured decision-making.

This includes enhancing FP&A capability, refining performance management frameworks, and improving the quality and consistency of financial insight available to leadership.

FINANCE TRANSFORMATION & OPERATING MODEL

Improving how finance operates at a structural level.

Work in this area focuses on operating models, governance frameworks, and process design, ensuring that finance functions are aligned with business priorities and capable of supporting growth.

CORPORATE FINANCE & STRATEGIC INITIATIVES

Providing additional analytical depth and support around key financial decisions.

This includes investment evaluation, funding considerations, and transaction-related activity, with a focus on clarity, structure, and stakeholder alignment.

SYSTEMS, REPORTING & ANALYTICAL CAPABILITY

Enhancing the underlying infrastructure of finance.

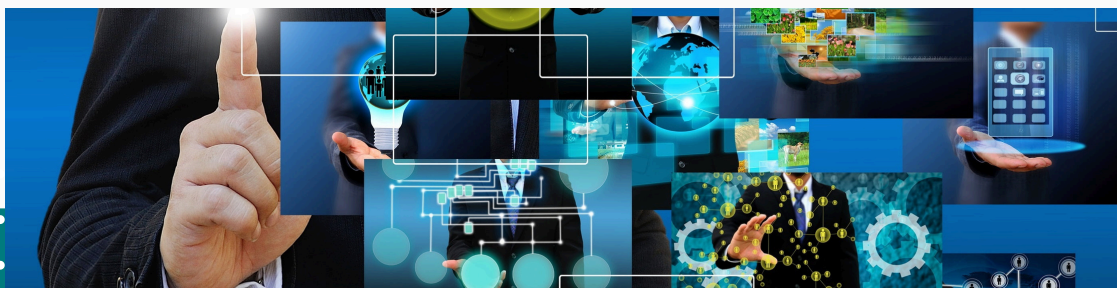

This involves strengthening reporting frameworks, improving system effectiveness, and building analytical capability that supports timely, reliable, and insight-driven financial information.

FLEXIBLE CFO-LEVEL SUPPORT

Providing access to senior finance expertise where additional leadership capacity is required.

This allows organizations to strengthen finance leadership during periods of transition, growth, or transformation, while maintaining continuity within existing structures.

ABOUT ACS SYNERGY

ACS SYNERGY is a **Singapore** headquartered global CFO advisory and finance transformation firm, supporting organizations across the **GCC, United Kingdom, North America**, and international markets.

We partner with CFOs, CEOs, and leadership teams to strengthen financial performance, enhance decision-making, and build high performing finance functions aligned with strategic objectives.
